EDUCATION

Westcliff University – Irvine Campus

Summer 2027

- Master of Science in Engineering Management
- Relevant Coursework: System Engineering, IT Project Management

Northeastern University, Boston, MA

- Master of Science in Data Analytics Engineering & Analytics (Duel Degree), GPA: 3.73 Winter 2022
- Relevant Coursework: Probability & Statistics, Data Mining, Neural Network & Deep Learning, SQL, Predictive Analytics, Data Warehousing

Georgia Institute of Technology, Atlanta, GA

Winter 2016

- Bachelor of Science in Environmental Engineering

CERTIFICATIONS & TECHNICAL SKILLS

- Certifications: Google Data Analytics Certificate, Google Business Intelligence Professional Certificate
- Programming & Query Languages: Python, SQL, R, SAS
- Data Analysis & Cloud Tools: BigQuery, Pandas, NumPy, Microsoft Azure (Data Factory & Studio), CosmosDB
- Visualization & Reporting: Tableau, PowerBI, Excel, RShiny
- Statistical Modeling & Machine Learning: Predictive Modeling, Time-series Forecasting, Keras, Neural Networks

EXPERIENCE

Product Analyst Co-Op, Akamai Technologies, Cambridge, MA

Jul 2021 – Dec 2021

- Queried deployment data, forecasted periodic growth with statistical models in Python, improving planning accuracy and supporting proactive planning.
- Scripted automated tool for data cleaning, analysis, and dynamic forecasting, reducing manual effort and providing on-demand capacity forecasting for the team.
- Identified cost-efficient deployment strategies through BI analysis, contributing to an estimated deployment cost reduction of \$5 million.

Graduate Student Ambassador

Jan 2022 – Dec 2022

- Represented the Data Analytics Engineering program at global and regional recruiting events, sharing experiences to engage prospective students and promote the program.
- Organized campus events to foster student community and professional network. Mentored 5+ students who successfully landed co-ops.
- Collaborated with the admission and student services team to support prospective students with on-campus resources. Aided 500+ students during onboarding and campus orientations.

Graduate Teaching Assistant – Probability Theory and Statistics

Fall 2019

- Mentored students on course materials and report writing to improve their academic performance.
- Drafted problem sets and led review sessions, contributed to a 100% exam and course pass rate.

PROJECTS

Business Operation Optimization and SOP Design

Spring 2025

- Led a 6-member team in a consulting-like engagement to analyze workflows and translate ambiguous business problems into an actionable plan via SOPs.
- Spearheaded project coordination to ensure task alignment and timely delivery.
- Facilitated regular communications and task delegation to maintain steady project progress and client satisfaction.
- Developed project management and client assessment SOPs, and provided clients with an immediate, actionable plan that they formally approved.

Used Car Sales Data Management System (Cosmos DB, Azure Data Factory, PowerBI)

Fall 2022

- Led a 4-member team from defining project scopes, designing a scalable database to coordinating execution.
- Scripted data pipeline with refresh feature in Data Factory to extract, transform, and load raw data into CosmosDB.
- Developed an interactive dashboard in PowerBI, revealing national purchasing trends and identifying popular brands.

Image Classification Model (Python, Neural Network Models)

Winter 2019

- Led a four-member team to design and develop a deep learning model using Keras to classify unsafe sidewalk conditions from images.
- Improved performance by ~30% using image augmentation, hue/saturation adjustments, and model tuning.
- Presented the model with real-world image data, demonstrating a viable solution with the potential to enable proactive maintenance to improve public safety.
